SYRUP NO. 01

Vanilla Syrup

INGREDIENTS

Turbinado Sugar	2 cups
Water	1 cup
Vanilla Bean Paste	1 tbsp
Salt	pinch

YIELD — ≈ 540 ML

METHOD

-
- 01 Add the sugar and water to a saucepan over medium heat.
 - 02 Stir until the sugar dissolves, then bring to a boil.
 - 03 Take the pot off the heat and stir in the vanilla bean paste and a pinch of salt.
 - 04 Let cool, then transfer to a bottle or jar.
-

The pinch of salt isn't a mistake — it rounds out the sweetness and makes the vanilla taste even more like vanilla. Keeps refrigerated for about a month.

SYRUP NO. 02

Banana Bread Syrup

INGREDIENTS

Unsalted Butter	1 tbsp
Bananas, mashed	2
Brown Sugar	1 cup
Water	1 cup
Ground Cinnamon	1 tsp
Vanilla Bean Paste	1 tsp
Salt	pinch

METHOD

-
- 01 Add the butter to a saucepan over medium heat. Add the mashed bananas and brown sugar.
 - 02 Let caramelize for 2–3 minutes, then add the water, cinnamon and salt. Mix and bring to a boil.
 - 03 Reduce heat and simmer for 7–10 minutes.
 - 04 Turn off the heat and stir in the vanilla.
 - 05 Let cool to room temperature, then blend or strain.
-

Store in an airtight jar and refrigerate for up to 3 weeks.

SYRUP NO. 03

Strawberry Syrup

INGREDIENTS

Strawberries, fresh or frozen	275 g
Sugar	325 g
Water	325 ml

YIELD — ≈ 850 ML

METHOD

-
- 01 Add the strawberries, sugar and hot water to a pot.
 - 02 Turn the heat to medium-high and stir to help dissolve the sugar.
 - 03 Bring to a boil, then simmer for 8 minutes.
 - 04 Remove from heat and blend with an immersion blender until smooth.
 - 05 Let cool, then transfer to a jar or bottle.
-

Keeps refrigerated for 3–4 weeks.

SYRUP NO. 04

Caramel Syrup

INGREDIENTS

Sugar	1 cup
Water	1/4 cup
Heavy Cream, warmed	1/2 cup
Unsalted Butter	2 tbsp
Salt	1/2 tsp

YIELD — ≈ 360 ML

METHOD

-
- 01 Warm the cream (stovetop or microwave) and set aside.
 - 02 Combine the sugar and water in a saucepan over medium heat. Don't stir — swirl the pan occasionally to help it dissolve evenly.
 - 03 Cook until the sugar turns a deep amber color, watching closely — it can go from amber to burnt in seconds.
 - 04 Remove from heat and carefully whisk in the warm cream — it will bubble vigorously.
 - 05 Whisk in the butter and salt until smooth.
 - 06 Let cool, then transfer to a bottle or jar.
-

A lightly salted caramel. Keeps refrigerated for about 2 weeks; warm slightly if it thickens too much in the fridge.

SYRUP NO. 05

Honey Cinnamon Syrup

INGREDIENTS

Honey	1 cup
Water	1/2 cup
Cinnamon Sticks	2
Salt	pinch

YIELD — ≈ 360 ML

METHOD

-
- 01 Combine the honey, water and cinnamon sticks in a saucepan over low-medium heat.
 - 02 Warm gently, stirring to dissolve the honey into the water — do not boil, to protect the honey's flavor.
 - 03 Once combined, remove from heat and let the cinnamon steep for 15–20 minutes.
 - 04 Remove the cinnamon sticks, stir in a pinch of salt, then let cool.
 - 05 Transfer to a bottle or jar.
-

Keeps refrigerated for about 2 weeks.

SYRUP NO. 06

Mango Syrup

INGREDIENTS

Mango, fresh or frozen	250 g
Sugar	1 cup (≈ 180 g)
Water	1 cup (≈ 220 ml)

YIELD — ≈ 600 ML (20 FL OZ)

METHOD

-
- 01 Peel and chop the mango, then blend until smooth to make a purée — a small splash of water helps it along, if needed.
 - 02 Pour the purée into a saucepan, add the sugar and water, and stir to combine.
 - 03 Bring to a gentle boil over medium heat, whisking continuously until the sugar fully dissolves.
 - 04 Remove from heat and let cool completely.
 - 05 Transfer to a clean bottle or airtight container.
-

Store refrigerated for up to 2 weeks — shake well before each use.

11

Cold Foam

The base cold foam used across the Signature Matchas.

Matcha On Ice

COLD FOAM

About Cold Foam

Cold foam comes together from three components: two parts Heavy Cream, which brings fat, creaminess and structure; one part Whole Milk, which lightens the texture; and one part Syrup or purée, which brings flavor, sugar and liquid.

It's built in two stages. First, air is whipped into the mixture, so it gains volume and grows in size. Then that air is textured into the base, giving the foam its velvety, light finish.

BASE RATIO

2 : 1 : 1 (Cream : Milk : Syrup)

For every 4 oz of base — 2 oz heavy cream, 1 oz whole milk, 1 oz syrup or purée.

COLD FOAM

Recipe

BATCH — MAKES ≈ 32 OZ

Heavy Cream 16 oz

Whole Milk 8 oz

Syrup 8 oz

METHOD

- 01 Combine the heavy cream, whole milk and syrup in a 2:1:1 ratio.
- 02 Whip to incorporate air — the mixture will grow in volume.
- 03 Continue whipping to texture that air into the base, until velvety and light.
- 04 Batch ahead of the shift and keep refrigerated for quick service.
