Espresso Basics

Dose, yield and extraction time — the shot every espresso classic and Signature Coffee is built from.

Matcha On Ice

ESPRESSO BASICS

Pulling a Shot

Espresso is brewed by forcing hot water through finely-ground, tamped coffee under pressure — roughly 9 bars — extracting a concentrated shot with a layer of golden crema on top.

Every espresso-based drink in this manual starts from the same double shot: 2 oz, pulled to land in a 25–30 second window. Dial the grind in against that window, not the clock alone — finer if it runs fast and sour, coarser if it runs slow and bitter.

EXTRACTION TIME

25–30 SEC (from first drop)

Adjust grind size until the shot lands in this window at your standard dose.

ESPRESSO BASICS

The Standard

HOUSE SHOT — DOUBLE

Dose (ground coffee) 18 g

Yield (liquid espresso) 2 oz

Extraction Time 25–30 sec

METHOD

- 01 Dose and distribute the ground coffee evenly in the portafilter basket.
- 02 Tamp level and firm, straight down.
- 03 Lock in and start the shot immediately — don't let it sit.
- 04 Time the extraction from the first drop; stop at 2 oz.
- 05 Adjust the grind size, not the dose, to hit the window.

11

Espresso Classics

The standard bar drinks — same double shot, different milk and water.

Matcha On Ice

ESPRESSO CLASSIC NO. 01

Espresso

INGREDIENTS

Espresso Double, 2 oz

CUP — 2–3 OZ DEMITASSE

METHOD

- 01 Pull a double shot directly into the serving cup.
- 02 Serve immediately, while the crema is still fresh.
- 03 Discard and re-pull if the shot didn't land in the 25–30 second window.

No milk, no water — just the shot. The purest test of a dial-in.

ESPRESSO CLASSIC NO. 02

Americano

INGREDIENTS

Espresso Double, 2 oz

Hot Water 4–6 oz

CUP — 8 OZ

METHOD

- 01 Add hot water to the cup first.
- 02 Pull the double shot on top of the water.
- 03 Adjust the water for a stronger or lighter cup.

Water first, then espresso on top — pulling the shot before the water breaks up the crema.

ESPRESSO CLASSIC NO. 03

Macchiato

INGREDIENTS

Espresso Double, 2 oz

Milk Foam 1 tsp, dolloped

CUP — 2–3 OZ

METHOD

- 01 Pull a double shot into the serving cup.
- 02 Steam a small amount of milk to a thick foam.
- 03 Spoon a dollop of foam onto the shot — don't stir it in.

Macchiato means "marked" — the foam should mark the surface, not drown the shot.

ESPRESSO CLASSIC NO. 04

Cortado

INGREDIENTS

Espresso Double, 2 oz

Steamed Milk 2 oz

CUP — 4 OZ

METHOD

- 01 Pull a double shot into the serving cup or glass.
- 02 Steam milk to a silky texture with minimal foam.
- 03 Pour in milk to roughly match the espresso, equal parts.

Cortado means "cut" — the milk cuts the espresso's acidity without floating on top like foam.

ESPRESSO CLASSIC NO. 05

Flat White

INGREDIENTS

Espresso Double, 2 oz

Steamed Milk 4–5 oz, microfoam

CUP — 6 OZ

METHOD

- 01 Pull a double shot into the serving cup.
- 02 Steam milk to a thin, velvety microfoam — about 0.5 cm.
- 03 Pour in a steady stream, integrating the microfoam rather than floating it on top.

Less milk and less foam than a latte — the espresso should still lead.

ESPRESSO CLASSIC NO. 06

Cappuccino

INGREDIENTS

Espresso Double, 2 oz

Steamed Milk 3 oz

Milk Foam 1 cm cap

CUP — 6 OZ

METHOD

- 01 Pull a double shot into the serving cup.
- 02 Steam milk to a thick, airy foam.
- 03 Pour to fill, finishing with a full foam cap.

Traditionally close to equal thirds — espresso, steamed milk, foam.

ESPRESSO CLASSIC NO. 07

Latte

INGREDIENTS

Espresso Double, 2 oz

Steamed Milk 6–8 oz, thin foam

CUP — 8–12 OZ

METHOD

- 01 Pull a double shot into the serving cup.
- 02 Steam milk to a thin microfoam — about 0.5 cm.
- 03 Pour to fill, finishing with a thin foam layer.

The most milk-forward of the classics — a mellow, rounded cup.

III

Signature Coffees

Single-origin espresso, built slow and served cold.
